

CLUSTER FOR SMART, GREEN, AUTOMATED AND INTEGRATED TRANSPORT.

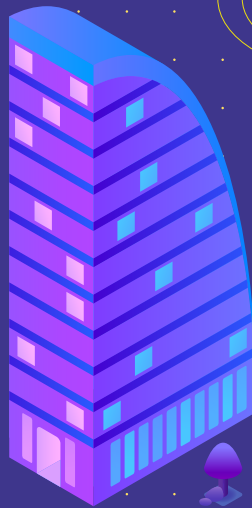

AUTOMATE

Transport represents almost a quarter of Europe's greenhouse gas emissions and is the main cause of air pollution in cities.

The AutoMate Cluster aims to revolutionise urban mobility by making transport smarter, greener and more integrated thanks to connected and automated vehicles (CAVs).

AutoMate is a collaboration of six automated mobility projects, and will provide the following solutions:

- 
- 
- 
- 
- 
- 
- 
- 
- 
- Experimental activities to improve end-user acceptance of CAVs
 - Decision support methodologies and tools for public authorities
 - Recommendations for a new generation of Sustainable Urban Mobility Plans
 - A marketplace, serving as a one stop shop for Connected, Cooperative & Automated mobility (CCAM) products, components and services

- Involvement of citizens to gather expectations and impact of CAVs on users
- A guide to navigate urban mobility through transition
- Trainings for public transport operators and authorities for the local deployment of CAVs

JOIN US ON OUR MISSION TO ACCELERATE THE TRANSITION TOWARDS SMART, INTEGRATED, SUSTAINABLE AND AUTOMATED URBAN TRANSPORT.

This factsheet has been produced by ICONS in the context of the Horizon Results Booster services delivered to SHOW (GA N. 875530), FRONTIER (GA N. 955317), ULTIMO (GA N. 101077587), SPROUT (GA N. 814910), HARMONY (GA N. 815269) and PASCAL (GA N. 815098).
